POWERFUL!

24-BIT I/C COMPUTER

HIGH RELIABILITY, high speed, low cost, and small size are features you automatically get with the μ -**COMP** DDP-124 general purpose digital computer. It incorporates field-proven μ -**PAC** I/C logic modules. Modular construction and front access to both modules and interwiring simplify maintenance.

MEMORY: μ -**STORE** ICM 40 with 1.75 μ sec cycle time.

SPEEDS: Up to 285,000 computations-per-second with 3.5 μ sec add, and 571,000 words-per-second I/O transfer.

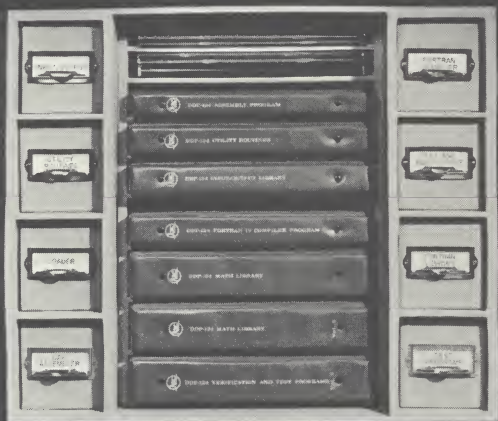

SIZES: Fit all requirements. 8K- to 32K-word capacity. Wide selection of options. Complete system, with up to 16K memory, fits into single 19" rack cabinet.

INCLUDED: I/O typewriter, high speed paper tape system, and integral console are standard; remote console (shown) optional.

■ **NOW . . . 60 DAY DELIVERY** on basic configuration of DDP-124 — your finest 24-bit I/C computer buy — with 8,192-word μ -**STORE** core memory and complete software library. \$65,000.

■ **NEW . . . LOW PRICES** on larger capacity DDP-124 I/C computers — 16K-, 24K-, and 32K-word systems with complete software library. \$87,000, \$109,000, and \$131,000 respectively.

COMPLETE! SOFTWARE SUPPORT

IN-DEPTH SOFTWARE, field-proven and ready to use, is available with the purchase of each μ -**COMP** DDP-124 I/C computer. You can get a FORTRAN IV compiler with Boolean capabilities, a complete symbolic assembler, systems programs, I/O programs, math programs, test programs, utility programs . . . 253 in all.

Programs and a complete set of documentation manuals are organized in this exclusive software program library box. They're convenient — right at your fingertips to help solve programming problems in areas such as flight simulation, message switching, physics research, radar tracking, data acquisition, scientific computation, missile tracking, and impact prediction.

USER'S GROUP membership is free. You receive programming support and a complete library of user subroutines.
